

THE PROBLEM: FRAGMENTED ATTENTION

Broadcasters, sponsors, and rights holders receive passive impressions, but rarely own a measurable, repeatable participation loop around live moments.

THE OPPORTUNITY: SYNCHRONIZED PARTICIPATION

The opportunity is not another football feed. It is a shared interaction layer built directly around the match.

One match. Two social experiences. One continuous fan journey.

Before kickoff,
make your call.

During the
match, play every
turning point
together.

Answer live challenges together.

Receive synchronized lock, resolution, points, and ranking.

Synchronized by the match. Trusted by every participant.

THE SYNCHRONIZATION PIPELINE

THE 4-PILLAR MATRIX

ACCESSIBLE

Guest-first
access.

No account. No OAuth.

No wallet.

No installation required.

REAL-TIME

Directly shaped
by the pitch.

TxLINE is the sole
authority for fixtures,
markets, live observations,
and match facts.

MULTIPLAYER

Simultaneous
social outcomes.

Private answers, one
authoritative deadline, and
synchronized resolution
across every device.

REPRODUCIBLE

Absolute
transparency.

The Official Review
reproduces verified outcomes
and rankings from an
append-only event ledger.

A **B2B2C** engagement layer built around measurable participation.

Brands

Become part of an opt-in football ritual, not an interruption.

Broadcasters

Extend live match engagement directly to the second screen.

Product: White-label experiences

Creators & Communities

Gain a shared, competitive loop.

Product: Branded VIRA Picks & Mini Leagues

Rights Holders

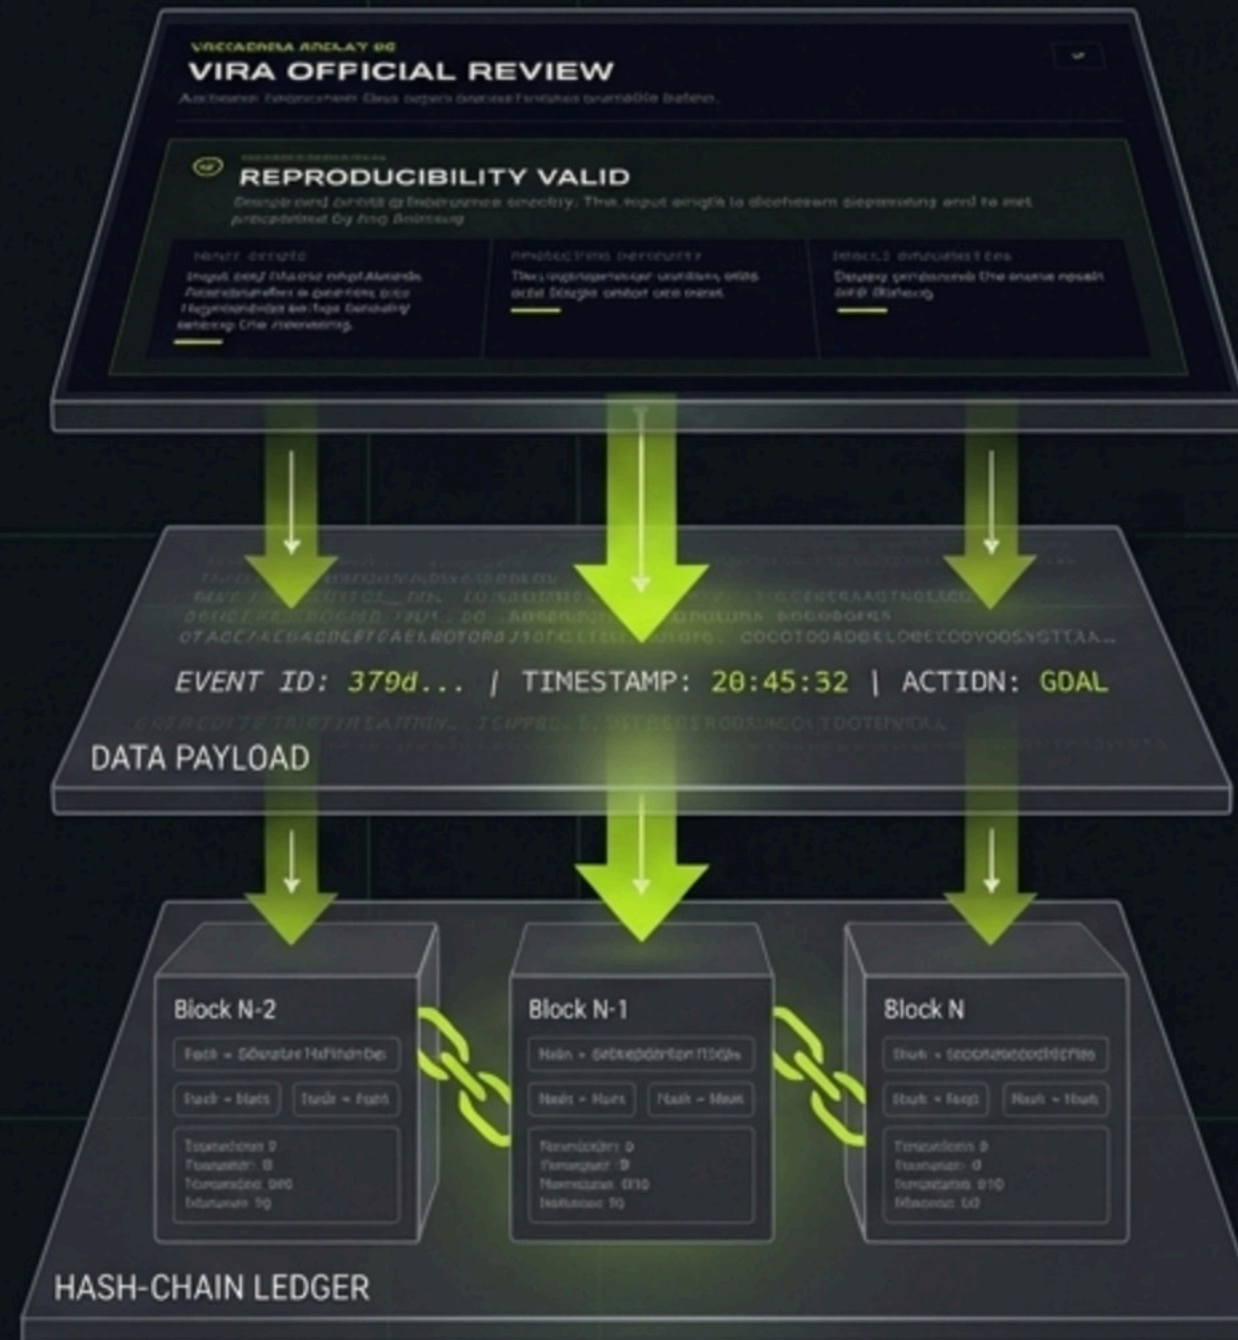

Gain measurable participation around official match moments.

Product: Tournament Engagement Packages

Functional today. Ready for a focused live pilot.

LIVE EVIDENCE CHECKLIST

- ✓ Deployed consumer product & public repository.
- ✓ Complete English and Brazilian Portuguese journeys.
- ✓ Chromium desktop and emulated Mobile WebKit certification.
- ✓ TxLINE-powered markets and live observations.
- ✓ Deterministic multiplayer, shareable cards, and reproducible replay.

Architectural Constraint

VIRA explicitly distinguishes between captured deterministic TxLINE demonstrations (used for guaranteed hackathon replays) and active live delivery.

No wagering, stake, token purchase, or financial return is part of the consumer experience.

Scalability is presented as a proven architecture path, not inflated user traction.
